

Keys for selecting tools

* Not in ImageReady

§ ImageReady only

*In Photoshop, shortcuts are customizable by using the Keyboard Shortcuts command. Choose Edit > Keyboard Shortcuts.

§Mac OS X users: In ImageReady, when the Use System Shortcuts preference is enabled, certain ImageReady keyboard shortcuts are usurped by OS X keyboard shortcuts. (For example, with the preference on, Command + H hides the application. With the preference off, Command + H shows/hides Extras.) To prevent this, press the Control key in addition to the shortcut or choose ImageReady > Preferences > General and deselect Use System Shortcuts.

| Result | Windows | Mac OS |
|--|---|--|
| Cycle through tools with the same shortcut key | Shift-press shortcut key (*when Use Shift Key for Tool Switch preference is disabled) | Shift-press shortcut key (*when Use Shift Key for Tool Switch preference is disabled) |
| Cycle through hidden tools | Alt-click + tool (*except add anchor point, delete anchor point, and convert point tools) | Option-click + tool (*except add anchor point, delete anchor point, and convert point tools) |
