

Different types of SKIRTS

A skirt is just a tube shaped garment hanging down from the waist. But it is a very versatile tube which makes the wearer sophisticated, feminine, flirty, warm, stylish, prim & proper, daring – depending on its make and mode.

I bet that you will find at least one skirt in every girl's wardrobe – at least as a **petticoat** or as a divided skirt or a **half slip** or whatever. You cannot ignore this piece of fabric sewn into many different styles and types to suit the body shape and the fashion style of the times.
