# HOBO BAG

A double strap shoulder bag with a ring, usually for evening dress and a fashion article. But it's a bag in one of the most and most popular bags in fashion history. It was invented (or rediscovered) around 1960, as the trend setting first lady of the United States was often spotted carrying the bag. The original style was the pearl on a silver chain. Subsequently, the first lady was replaced by Michelle Obama, who carried a black and white diamond bag in 2009, which was the first lady to carry a diamond bag in 2009 in the White House.
