* Silk Fabric rendering by using fabric colour.

- Use any fabric colour of your choice to give silk texture.
- Add little water after applying fabric colour (center of garment - light) side's will be darker.
- just add little bit of water at center area of a garment to give lighter effect.
(water quantity - just dip your brush & take it out)
- To avoid patches, use rag after dipping your brush into the clean water or used water in container.
- To add folds you can use darker shade of your colour like (blue + black) / (brown + black) / (pink + dark pink)
- To add light, use white colour in very less quantity and blend it with previous colour.
