

14. SALWAR

Measurements :

Length of salwar	-	39 inch
Round Hip	-	40 inch
Round bottom (poancha)	-	13 inch or desired width
Belt length	-	5 inch
Crotch length	-	14 inch

Method of drafting :

1. For drafting of Poancha :- make a rectangle ABCD where AB=CD= length of salwar -belt length + seam allowance. And AC=BD= round bottom -1'. Cut two pieces.
2. For drafting of Kunda :- make a rectangle EFGH, where EF = GH = (length of salwar-belt length +seam allowance) + (crotch length-belt length) and EG = FH= half width of fabric.
3. From E and H, mark the crotch length 'E' and 'H' respectively and join E'H' with a straight diagonal line. EF=GH= 1' AND FF'=GG'=1'. Cut four pieces of kunda.
4. For drafting of belt:- make a rectangle IJKL where IJ=KL= 1/4th of round hip +2inches and IK=JL= belt length + 2 inch for nepha+ seam allowances. Cut two pieces.

15. CHURIDAAR

Measurements :

Length	-	40 inch + 15 inch for Churidaar extension
Crotch length	-	15 inch
Round waist	-	40 inch
Round knee	-	12 inch
Round ankle	-	10 inch

Method of drafting :-

1. Make a line AB= actual length (waist to floor) - 5 inches for belt.
2. From B come down at O = extra length for gathers = 8-10 inches.
3. From A take point C= 1/4 of crotch/seat length + 4 inch.
4. From A take point D= waist to knee length - belt length.
5. From C take 1/4 th of crotch length + 4 inch. Mark E. from E take E' inwards = 1 inch.
6. From E', make a perpendicular line. Mark A'
7. From D, take 1/2 of round knee + 1 inch
8. From B and O', take 1/2 of round ankle + 1 inch.
